

Tailwind Assessment Task – Bodyshape Gym Website

Project Overview

You are required to design a landing page website named "**Bodyshape**". This project will help you practice building a professional landing page using **HTML** and **Tailwind CSS** while following a given **Figma design**. You must use the exact layout, colors, and typography as provided in the design file.

Project Technologies

- **HTML** (for structure)
 - **Tailwind CSS (Must)** (for styling and responsiveness)
 - **Font Awesome (Must)** (for icons)
 - **GitHub (Must)** (for code store & develop)
-

Project Requirements

- ☒ You **must follow the Figma design** – including layout, colors, spacing, and fonts.
- ☒ Use **custom fonts** as shown in the design.
- ☒ Make the page **fully responsive** for mobile, tablet, and desktop.
- ☒ Use **Font Awesome icons** wherever necessary.
- ☒ Push your project code to **GitHub** with at least **5 commits** (minimum).
- ☒ Write a **short project description** (in PDF format) covering:
 - A short description of your project
 - Technologies you used
 - Challenges you faced while building it

Important Note

- **Submission Deadline:**
 - Project Code + PDF Description must be submitted **in class** on **6 October 2025** and **7 October 2025**.
 - **Plagiarism Policy:**
 - If your project code or PDF description is copied from someone else, **both will receive 0 marks**.
-
